Summary

Full Stack Engineer with **3 years** building AI-powered web platforms from **0-to-1** to production scale. Specializes in **scalable agentic workflows**: autonomous LLM agents, event-driven pipelines, and DLQ-backed reliability, alongside modern **React / TypeScript** and **Node.js** full-stack development.

Work Experience

Full Stack Developer Aug 2023 – Present
CultureX Entertainment Private Limited (· Influenzer.ai & Steroids.ai) *Ahmedabad, India*

- **0-to-1 Platform:** Spearheaded end-to-end development of **Influenzer.ai** from concept to a live product serving **200+ active brand users** across 8 releases, full-stack with **React/TypeScript** and **Node.js/MySQL**, with REST APIs sustaining **100K+ daily requests** at **99.8% uptime**.
- **Agentic & Distributed Systems:** Owned backend infrastructure powering AI-driven **agentic systems** on Steroids.ai, driving architecture around queue systems, worker patterns, **DLQ handling**, and **Pub/Sub** under asynchronous, autonomous agent-execution workloads.
- **Reliability & Leadership:** Resolved high-priority production outages and stabilized **Gmail/YouTube/Facebook** integrations; served as **primary backend reviewer** and onboarded backend interns into active contributors.
- **Data-Driven Impact:** Integrated **Mixpanel**, **Google Analytics**, and **PostHog** (100+ events, 1.2M+ daily API calls), driving a **35% cut in customer-acquisition cost** and a **20% lift in conversions**.

Software Developer Intern Dec 2022 – June 2023
Crest Data Systems Private Limited *Ahmedabad, India*

- Co-developed the **Universal Rest Client (URC)** automating SIEM platform integrations and **reducing developer workload by 70%**, building scalable RESTful APIs in **Python** and **FastAPI** across the full development lifecycle.

Key Projects

Mastermind | *Flagship Autonomous AI Matching Agent* | TypeScript, LangChain, Qdrant, OpenAI, Whisper, AWS

- Sole architect of **Mastermind**, the **autonomous agent at the heart of Influenzer.ai**, that independently interprets a free-form brand brief, plans its own multi-stage retrieval-and-reasoning strategy, and converges on the top 100-200 creators from a **2,000+ profile pool** (a **20:1 funnel**) with **zero manual curation**.
- Engineered a **multi-modal RAG** reasoning core that fuses three independent creator signals (reel audio transcribed via **Whisper**, vision-derived thumbnail descriptions, and captions) into unified **OpenAI embeddings** in **Qdrant**, letting the agent match on genuine creative intent rather than keyword or follower-count heuristics.
- Designed a **stateful, self-correcting feedback loop** on **AWS Step Functions** that persists per-user decision context, learns from each rejection, and autonomously re-ranks across iterations, turning a one-shot search into a **continuously improving agent** that gets sharper with every interaction.
- Built the async media backbone (**S3 + SQS/SNS + Fargate**) processing thousands of assets in parallel, scaling Mastermind as the **core differentiator** powering discovery across the entire brand base.

NTN (No-Touch Negotiation) | *Autonomous AI Negotiation System* | TypeScript, LangChain, AWS, Gmail API

- Architected backend communication workflows connecting **autonomous AI agents** to creator negotiation pipelines for autonomous reasoning and response, removing manual touchpoints from the deal-closing loop.
- Built the email ingestion and contextual-storage pipeline feeding LLM agents, powering stateful, multi-turn negotiations via **event-driven flows triggered on influencer replies**.
- Designed a **DLQ-based retry mechanism** plus Gmail quota, rate-limit, and watch-renewal infrastructure for uninterrupted large-scale event processing, with **Mixpanel** observability.

Technical Skills

Languages: Python, TypeScript, JavaScript, C++, C

Frontend & Backend: React, Next.js, Tailwind CSS, Node.js, Express.js, FastAPI, RESTful API design

AI & Agentic Workflows: LangChain, LangGraph, OpenAI API, Whisper, LLM agents, RAG, autonomous workflow orchestration

Distributed Systems & Cloud: Event-driven architecture, SQS/SNS/Kafka, Pub/Sub, DLQ & retry; AWS (S3, Lambda, Fargate, Step Functions, SES), Docker, Git, CI/CD

Data & Observability: MySQL, MongoDB, Firebase, Qdrant; Mixpanel, Google Analytics, PostHog

Education

Bachelor of Engineering – Computer Science & Engineering 2019 – 2023
Charotar University of Science and Technology (CHARUSAT) (· CGPA: 9.04/10.0) *Anand, India*
